PROFESSIONAL SUMMARY

Junior Java Full Stack Developer with over 2 years of experience building web applications using React, TypeScript, and Tailwind CSS. I analyze requirements and anticipate potential challenges to design end-to-end solutions by connecting frontend applications, REST APIs, and backend services. I focus on optimizing each development process to create scalable, functional products centered on both user experience and business needs.

TECHNICAL SKILLS

Java | Spring Boot | .NET | JavaScript | TypeScript | React | React Router | Vite | HTML5 | CSS | Tailwind CSS | REST APIs | Axios | Swagger | i18n | Firebase | MySQL | PostgreSQL | MongoDB | Git | GitHub | Postman | Visual Studio Code | Figma | AWS | SCRUM | Jira

SOFT SKILLS

Teamwork | Attention to Detail | Adaptability | Continuous Learning | Organization | Responsibility | Proactivity

ACADEMIC PROJECTS

Java Full Stack Developer | Pa' la asada (July 2026 – October 2026)

- Designed and developed a responsive interface using Figma, HTML5, CSS, and JavaScript, improving the online shopping experience.
- Developed backend services using Java, Spring Boot, and MySQL, optimizing product and data management.
- Worked with Scrum, Jira, GitHub, and a Git branching workflow, improving team organization and collaboration.

Desarolladora Front End | Voltium – Hackathon Generation México (August – 2026)

- Contributed to the development of a multi-brand sports e-commerce platform, helping create a modern and accessible shopping experience.
- Developed a responsive navbar and footer using HTML, CSS, JavaScript, and Bootstrap, improving navigation across different devices.
- Collaborated on the prototype using Figma and integrated animations and tooltips with AOS and Popper.js, creating an intuitive interface.

WORK EXPERIENCE

Full Stack Developer | SynaptiX Cognitive S. de R.L. de C.V. (April 2025 – February 2026)

- Developed web interfaces using React, TypeScript, Vite, and Tailwind CSS for administrative and user-facing applications, improving usability and user experience.
- Built inventory and user CRUD modules and integrated Firebase for multimedia content, optimizing information and digital resource management.
- Implemented user authentication and registration and integrated .NET backend services through REST APIs, Swagger, and Axios, strengthening security and frontend-backend communication.
- Configured internationalization (i18n) in English and Spanish, making the platform adaptable to different users.

Front-End Web Developer | Servicios Digitales Disinet S.A.S. (September 2023 – April 2025)

- Developed responsive landing pages using React and Tailwind CSS, improving presentation and adaptability across different devices.
- Configured hosting and domains and integrated APIs, facilitating the deployment and operation of web solutions.
- Managed online stores on Shopify and Mercado Libre, contributing to the presence and operation of online sales channels.

EDUCATION

- Generation México Bootcamp** | Java Full Stack Developer (July 2026 – October 2026)
- Bachelor's Degree in Software Development and Management Engineering (Degree completed)** | Universidad Tecnológica de Tecámac (Septiembre 2023 - Abril 2025)
- Higher University Technician in Multiplatform Software Development (Degree completed)** | Universidad Tecnológica de Tecámac (August 2021 – August 2023)

COURSES

- Introduction to Java** | Accenture Learning to Earning – July 2026
- Professional Docker Course** | Código Facilito – May 2025
- Career Essentials in Generative AI** | Microsoft – January 2025
- Modern JavaScript** | Udemy – February 2024

LANGUAGES

- English** | B1 (Intermediate)
